

Inflatable Packaging's Void-Fill™ Bags are a revolutionary way of packaging your shipments. With no expensive or complicated machinery to buy, Void-Fill™ bags are ready to use out of the box. Inflate by using compressed air and our high speed inflation probe. Void-Fill™ Bags provide a solution to using messy bulk fillers like paper and peanuts. Void-Fill™ bags offer the advantages of efficiency and space savings, just four boxes is equivalent to an entire truckload of peanuts. Void-Fill™ is easy to use and versatile. Because Void-Fill™ expands to fill all empty space, one size Void-Fill™ bag can be used for a range of boxes and products. With Void-Fill™ Bags you'll never have to worry about migration or compression issues linked to loose fills. Reduced product damage from enhanced internal box support and migration elimination lower customer damage claims. Void-Fill™ bags are also reusable; a self-sealing valve allows re-entry for inflation and deflation. Void-Fill™ bags consistently provide a clean, clear, professional looking solution every time. Inflatable Packaging's Void-Fill™ bag system provides a convenient cost effective packaging solution whether you are a home business or a fortune 500 company.

PRODUCT FEATURES

- Provides both top and side fill.
- Bags lock products in place during shipping and strengthen carton.
- Eliminates migration and bulk fill compression.
- Can cut shipping costs by up to 25%
- Fill up to 300 boxes per hour.
- Versatile and easy to use.
- Add air to bag after the box is taped and closed.
- Saves valuable warehouse space. One pallet equals fifteen truck loads of loose fill!
- Consistent pack every time. Eliminates packing subjectivity.
- Creates a clean, clear, professional solution.
- Major source reduction - as much as 90%. VS Bulk Fill
- Minimal operator training required.
- No expensive or complicated machinery to buy.
- Reduce lost products in shipment.

PROTECTION & PRESENTATION

Void-Fill™ Bags provide both top and side fill, locking products in place and reinforcing the carton. Void-Fill™'s design eliminates migration and bulk fill compression, resulting in consistent and reliable packaging. Void-Fill™ helps to protect your products by locking them in the way you put them in the box. In addition, the clear bag makes it easy for customers to see everything they are receiving.

PROCESS

1. Insert inflation probe into the self-sealing valve of the Void-Fill™ Bag.

2. Place empty bag on top of products, resting the probe in corner of the box.

3. Tape the box and inflate bag until there is a slight rise in the top of the

STANDARD SIZE AND QUANTITY

PRODUCT	SIZE	QUANTITY/ BOX	QUANTITY/MASTER CASE
VF1012	10 x 12	500	1500
VF1418	14 x 18	500	1500
VF1818	18 x 18	250	750
VF2318	23 x 18	250	750
VF2924	29 x 24	250	750
VF3618	36 x 18	100	300
VF2736	27 x 36	100	300
VF3436	34 x 36	100	300
VF4236	42 x 36	100	300
VF5136	51 x 36	100	300

EFFICIENCY & DURABILITY

Easy operator training and unmatched reliability make packaging with Void-Fill™ easy. One pallet of Void-Fill™ is the equivalent of up to 15 trailer loads of loose fill, saving valuable warehouse space. Void-Fill™ reduces packing times by inflating quickly and allowing for adjustments. Reduced product damage due to box compression and impact resistance decreases customer damage claims. Void-Fill™ bags are made of an amazing poly/nylon film structure providing superior air retention and load characteristics with a featherweight design.

MADE IN AMERICA

Inflatable Packaging takes pride in the fact that Void-Fill™ products are manufactured and engineered in America.
