

Inflatable Packaging

AIRBAG™

Airbag inflatable pouches are technology driven solutions designed to protect an array of products while in transit, and the environment after the shipping cycle is complete. The patented design uses multiple chambers to surround the product for complete protection, yet each chamber is independent of the others, providing uninterrupted protection.

Q Bag, offset opening, hinged back

U Bag, open end

Q Bag, center opening, double hinged back

Top & Bottom covers with overlap

Q Bag, center opening, double hinged back, extended top

End Caps

Features	Benefits
Non-reliant Chambers	<ul style="list-style-type: none"> ◆ Universal pressure control ◆ If one chamber fails, others remain intact
Size	<ul style="list-style-type: none"> ◆ Bags are filled on-demand, reducing valuable warehouse space ◆ Lighter weight protection reduces shipping costs ◆ Improved protection in a smaller footprint ◆ 90% source reduction vs foams
Variety	<ul style="list-style-type: none"> ◆ Large Electronics – TVs, PCs, Monitors/Screens ◆ Portable Electronics - Laptops, DVD drives, Cameras ◆ Small Electronics – Cell phones, MP3s ◆ Consumables – Wine/Liquor, Cosmetics, Pharma ◆ Other – refurb. toner cartridges, dental molds
